WHATS' SPECIAL IN TALKDELTA PRIME?

With all the existing features of Talkdelta Single User we are now introducing few new features with a new face & name as Talkdelta Prime.

V WAP (Volume-Weighted Average Price)

By taking into account price and volume this special price average gives you more accurate snapshot of price action.

Gives you an accurate assumption of the closing price after 3.15 PM

VWAP 30 enables you to take a position in ATM strike price in the last 5 minutes

Gives accurate results after every 1-minute interval by comparing historical data.

Identify OTM options and trades on expiry days using VWAP30.

Get VWAP and VWAP30 in a portfolio in Talkdelta Prime itself.

This strategy allows a trader to understand price points of interest, gauge relative strength & intraday indicator for identifying & managing entries & exits.

IBT Broadcast Service (Live Rates)

Get live updates of share market through IBT. Track of recent stock price through IBT.

समय है
Smart Work का,
समय है
Talkdelta Prime का.
